Skills

- Cypress, Playwright
- Postman, JMeter, Swagger
- JavaScript, TypeScript, React
- HTML, CSS, Tailwind CSS
- Git, GitHub, GitHub Actions
- Figma, Docker, Jira, TestRail
- MySql, MSSQL

Education

2022 - Current
Bachelor's degree
Electronics and automation
Dnipro University of Technology

Languages

English - B1
Ukrainian - Native

Experience

Testlo — Crowdtesting

Manually tested accessibility, design compliance on the web and native apps on desktop/mobile devices. Executed test cases, user stories, and found bugs in general. Wrote bug reports.

Projects

Store — TypeScript (React), CSS, Supabase, Cypress

App with Redux and Supabase for product/user management. Integrated fakestoreapi, handled async logic, and tested key flows (auth, cart, search) with Cypress. Configured CI/CD with GitHub Actions: Node, pnpm, Cypress, and env from Secrets.

Journal — JavaScript (React), CSS, Cypress

Personal journal app with user and note management (stored locally). Explored React hooks, modular CSS, and tested core features (CRUD operations) using Cypress.

Playwright practice — TypeScript, Playwright

E2E test suite with Playwright using Page Object Model. Wrote UI tests for key flows and integrated Allure for reporting. Configured CI with GitHub Actions: Node, pnpm, Playwright.

ChessPlayAndLearn — JavaScript (React), Tailwind CSS

Chess app with three pages: Main (resource cards), Play (interactive chessboard), and Learn (carousel of terms and openings). Gained experience with Tailwind CSS, React routing, and component design.

NeonPeakChronicles — JavaScript

A web-based CCG roguelike game where player interactions are tracked and remembered. Learned project architecture, code optimization, and cloud deployment.
